

We currently seeking candidacies for a

PRODUCTION TECHNICIAN

Green Cross Biotherapeutics is seeking a **Production Technician** to add to their team in Montreal. You are working in a manufacturing environment regulated by cGMPs, SOPs, safety procedures and all company policies/regulations. As production technician you'll be primarily assigned to one of the following areas: fresh frozen plasma, cutting/pooling/centrifugation, fractionation, purification, fill/finish, visual inspection or packaging but will be expected to develop multi-disciplinary skills by alternating to other areas of production and assisting with business demands (buffer preparations, warehouse...).

The challenges of the job...

Your **key duties and responsibilities include:**

- Set up and operation: CIP/ SIP Skids, Autoclaves and Parts Washers
- Set up, operation and cleaning the following equipment (depending on the designated production area): Buffer Preparation Skids, Centrifuge, Fractionation Skids and Filter presses, TFF Skids and columns, Chromatography Skids, Filtration Skids and Filling line (within an isolator)
- Participate in all production activities related to the assigned area including sampling (process and cleaning validation, environmental monitoring, clean utilities), in-process testing, weighing, calibration and maintenance of equipment (pH meter...)
- Actively participate in writing and implementing GMP documents (SOPs, batch records) using the change control system and maintain records of all necessary information/data as per GDPs
- Coordinate with the support departments to ensure any quality, validation and maintenance issues are addressed in a timely manner
- Assist in engineering FAT, SAT and all related equipment qualification activities

Do you have...

The following **qualifications and skills:**

- College diploma in pharmaceutical technology or University degree in Engineering or Science
- Minimum 1-year experience within the biopharmaceutical, pharmaceutical or healthcare industry
- Ability to work in a fast-paced environment and manage multiple priorities
- Ability to work independently as well as in a team environment
- Must be able to lift at least 15kg and wear PPE as required
- Some tasks will involve working in a refrigerated environment
- Experience in clean room operation is an asset
- Bilingualism (French and English) both spoken and written

Our biopharmaceutical company was a greenfield project and is now positioned to launch its activities. We are growing rapidly, join our dynamic team!

About us...

As a global leader in healthcare, GCBT provides safe and effective solutions for the evolving needs of the industry. Headquartered in Yongin, South Korea since 1967, we specialize in the development and manufacture of plasma derivatives, preventive vaccines, recombinant proteins and therapeutic antibodies.

After more than 50 years in business, we are an internationally recognized specialty biopharmaceutical company. GC Pharma employs over 4,600 people in its 15 subsidiaries worldwide. Our GCBT Montreal subsidiary (located in the St-Laurent TechnoParc) is the only intravenous immunoglobulin (IVIG) and albumin manufacturing plant in Canada. This state-of-the-art facility marks the beginning of a new chapter in the history of the Canadian biopharmaceutical industry.

The products manufactured in this facility will provide key therapeutic solutions for the treatment of patients with infectious and immune diseases, severe burns and those needing blood-volumizing agents.
