

We are currently seeking candidacies for a

BUILDING TECHNICIAN (Water Systems)

Green Cross Biotherapeutics is seeking a Building Technician specialised in water systems to add to their team in Montreal. You must be organised and be comfortable working in a regulated manufacturing environment. As a Building Technician you are responsible for the inspection, maintenance, repair, replacement and troubleshooting of the building's water systems (ie.: Purified Water, Water for Injection Systems and Pure Steam).

The challenges of the job...

Your **key duties and responsibilities include:**

- Perform scheduled preventive maintenance as per established procedures and according to GMP
- Support Utilities and Maintenance Lead in the timely resolution of deviations and CAPA's
- Record scheduled maintenance tasks by completion of forms and documentation
- Operate computers which control and monitor equipment and utility systems (Building Automation System)
- Maintain constant attention to facility and system operations, provide first responder services to alarms and other recognized system problems
- Assist in the diagnosis and resolution of associated problems that could affect operations
- Assist boiler personnel in the change-out of installed and replacement equipment
- Utilize Computerized Maintenance Management System (CMMS)
- Review and write maintenance procedures for building systems
- Share knowledge and best practice with project team and other teams
- Arrange for Contract/Third Party services as required and supervise all work performed
- Ensure that all work is performed in full compliance with GMP, SOPs, Working Instructions, codes, regulations and established safety standards
- Review and write Working Instructions for utility systems

Do you have...

The following **qualifications and skills:**

- A College degree (DEC) or equivalent in Building Utilities and Maintenance Technology/*Technologie de la mécanique du bâtiment* or in Water Treatment Systems
- A minimum of 3 years relevant experience in the maintenance and repair of clean utility systems
- Experience in troubleshooting and repair of high purity water systems
- Computer skills and knowledge of MS Office
- Working knowledge of GMP and experience in the pharmaceutical industry
- Good communication and interpersonal skills, bilingualism (French and English)
- Ability to demonstrate initiative, self-motivation and the ability to plan and prioritize efficiently

About us...

As a global leader in healthcare, GCBT provides safe and effective solutions for the evolving needs of the industry. Headquartered in Yongin, South Korea since 1967, we specialize in the development and manufacture of plasma derivatives, preventive vaccines, recombinant proteins and therapeutic antibodies.

After more than 50 years in business, we are an internationally recognized specialty biopharmaceutical company. GC Pharma employs over 5,000 people in its 15 subsidiaries worldwide. Our GCBT Montreal subsidiary (located in the St-Laurent TechnoParc) is the only intravenous immunoglobulin (IVIG) and albumin manufacturing plant in Canada. This state-of-the-art facility marks the beginning of a new chapter in the history of the Canadian biopharmaceutical industry.

The products manufactured in this facility will provide key therapeutic solutions for the treatment of patients with infectious and immune diseases, severe burns and those needing blood-volumizing agents.
