

We are currently seeking candidacies for an

INSTRUMENTATION AND CALIBRATION TECHNICIAN

Green Cross Biotherapeutics is seeking an **Instrumentation and Calibration Technician** to add to their team in Montreal. You are responsible for performing the functions necessary to maintain, troubleshoot, repair, rebuild, install and calibrate pneumatic, hydraulic, mechanical and low voltage electrical control components/systems.

The challenges of the job...

Your **key duties and responsibilities include:**

- Troubleshoot, repair, maintain, calibrate, and modify pneumatic, hydraulic, low voltage and mechanical equipment or system components in accordance with all established regulatory and compliance and safety requirements
- Carry out both field and bench calibration duties and task instruments generated by CPM with various instruments following SOPs
- Integrity-test components to ensure product efficacy following SOPs
- Determine impact on production operations for work scheduled; coordinate and communicate with departments/customers
- Compile, enter data and maintain all documentation relevant to maintenance and calibration programs
- Manage and ensure calibration standards are up to date and traceable to NIST
- Arrange for Contract/Third Party services as required and supervise all work performed
- Ensure that all work is performed in full compliance with cGMPs, SOPs, WIs, codes, regulations and established safety standards
- Review and write Work Instructions for calibration procedures

Do you have...

The following **qualifications and skills:**

- A College or recognised Industrial Instrumentation degree or equivalent
- Minimum 3 years of experience in the maintenance, repair and calibration of pneumatic, hydraulic or mechanical and low voltage electrical control components/systems within the biopharmaceutical, pharmaceutical or healthcare industry
- Working knowledge of GMPs, Pharmaceutical or similar regulated industry experience preferred
- Experience in troubleshooting and repair of electronic equipment is a definite asset
- Proven capabilities in planning and organisation
- Demonstrated initiative and ability to be self-motivated
- Computer skills and knowledge of MS Office
- Good communication and interpersonal skills, in both French and English

Our biopharmaceutical company was a greenfield project and is now positioned to launch its activities. We are growing rapidly, join our dynamic team!

About us...

As a global leader in healthcare, GCBT provides safe and effective solutions for the evolving needs of the industry. Headquartered in Yongin, South Korea since 1967, we specialize in the development and manufacture of plasma derivatives, preventive vaccines, recombinant proteins and therapeutic antibodies.

After more than 50 years in business, we are an internationally recognized specialty biopharmaceutical company. GC Pharma employs over 5,000 people in its 15 subsidiaries worldwide. Our GCBT Montreal subsidiary (located in the St-Laurent TechnoParc) is the only intravenous immunoglobulin (IVIG) and albumin manufacturing plant in Canada. This state-of-the-art facility marks the beginning of a new chapter in the history of the Canadian biopharmaceutical industry.

The products manufactured in this facility will provide key therapeutic solutions for the treatment of patients with infectious and immune diseases, severe burns and those needing blood-volumizing agents.
